

Medisinsk kjølerom

Kjølerom mors (rom for døde)

Medisinsk kjølerom for døde

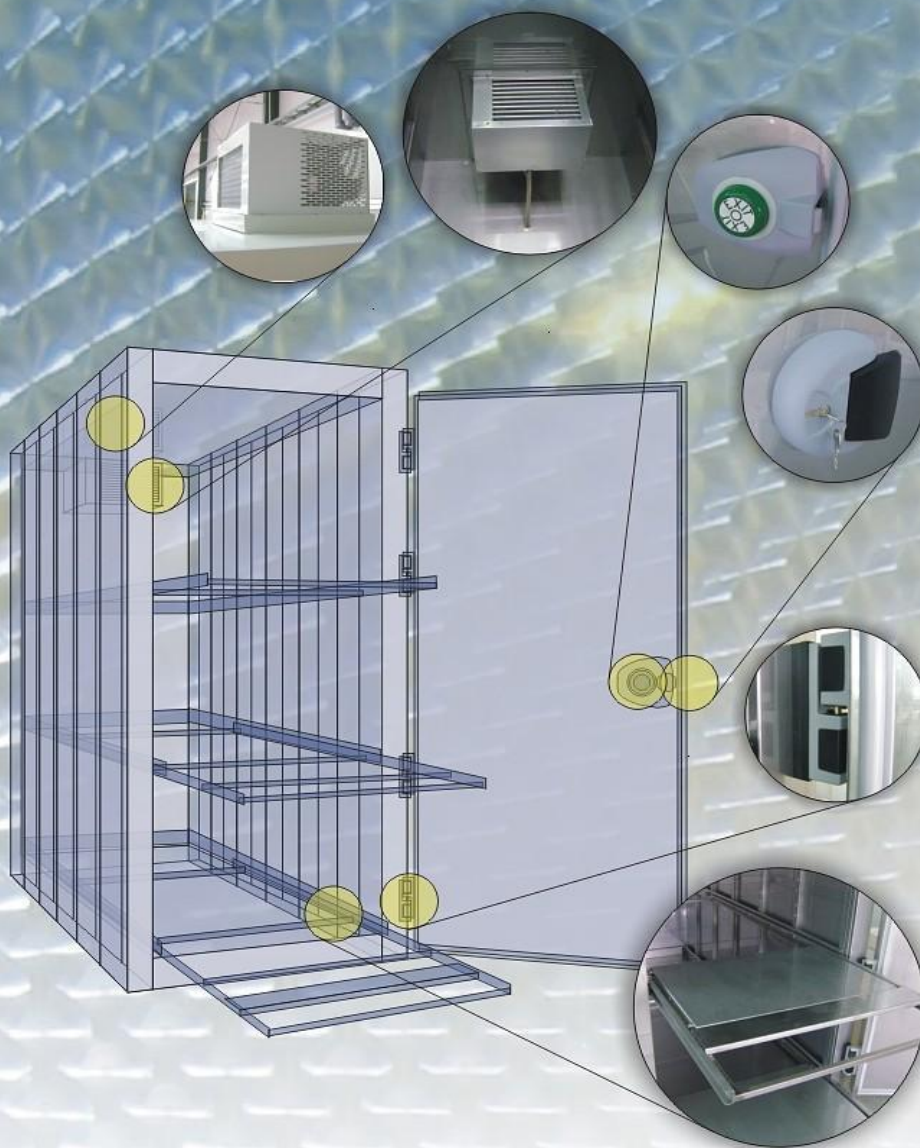

Coldor medisinske kjølerom er for lagring av kropp. Dette produktet tilbys til et bredt segment av brukere, inkludert laboratorier, begravelsesbyråer, sykehjem, sykehus, kirker etc. Enhetene produseres alltid i tett samråd med kundens individuelle ønsker. Rommene kan produseres fra rimelig og standard utgave til mer eksklusive modeller med spesialdesign (rustfritt stål, ornamenter, tre-imitasjoner). Vi leverer i tillegg spesielle vogner (manuelle eller automatiske) for heising av kister etc. for enkel håndtering.

Medical Refrigeration Units

Medical refrigeration units are for the storage of bodies. This product is offered to a broad segment of users, including anatomy laboratories, funeral homes, research institutes and units, hospitals, and design offices. The units are made in line with the individual wishes of customers. Dimensions, parameters, and all other technical details are always consulted with users. These units may be provided with many finish options ranging from the most economic and standard versions, all the way to luxury models with rich finish and special designs (stainless steel sheet metal, spotting finish circular grinding, sheet metal covered with imitation wood veneer, ornamental strips, etc.). We also provide additional equipment in the form of trucks for the moving and raising of coffins, trays, etc.

Kjølerom mors (rom for døde)
